## SIX WOMEN ARE 235 DRUGGISTS HERE OTTAWA CAPITOL BURNED TO DEATH PROTEST "DRY" BILL

#### Residence Blaze Also Does \$50,000 Damage in Brooklyn District.

NEW YORK, Feb. 4.-Six persons burned to death, one missing, and two injured was the toll of an early morning tire which destroyed the \$50,000 home of Mrs. Casimir Tag, widow of the president of the German-American

The Tag home is located on Hancock street in the exclusive residential section of Brooklyn.

Carrying the women to a place of safety, the firemen, surrounded by this time with a crowd of men, women, and children from the society neighborhood. most of them in night attire and bathrobes or overcosts, hoisted ladders at the front and rear of the house and began the rescue work while heavy streams of water played through the windows upon the blaze.

The dead are:

## **VICTIMS OF OVERWORK** CURED BY THE KNIFE

world today men are fighting harder, working harder and "living" harder than ever before, it has been observed by the medical profession. This intensive forcing of man's mental powers has just the same effect on his physical system as "firing up" a locomotive boiler.

tem as "Bring up" a locomotive boiler, since mental activity sets in motion certain physical elements in a man's body which, in turn, are transmuted into muscular energy.

This phenomena has now reached such an importance in the medical world that Dr. George W. Crile, the famous surgeon of Cleveland, has evolved a name for it. He calls it "the kinetic drive." And as a result of his studies of the phenomena he has worked out two sperations, new to the world of surgery, for lessening the force of this kinetic drive, if not its complete cure. It is the first time in the history of surgical science that the knife has been used to cure certain diseases which are now known to be the direct result of the over-hard "living" of which man is the victim today.

Reveals New Methods.

Up to the time this theory and practice of Dr. Crile's were worked out to a paptial solution—for he does not claim that his operations have ther-

a parkial solution—for he does not claim that his operations have thereughly solved the problem, only that they point the way to new methods—there were certain states of mental excitement in men and women which doctors, metaphysicians and clergymen sured with a certain degree of men cured with a certain degree of success by mental suggestion. The old "laying on of hands" was one of these cures—which really was the ef-

All these have had a curative effect on the kinetic drive when it was in what Dr. Crile calls a chronic state. That is, when a man or woman suf fered in an ordinary degree from mental and physical overwork, excessive diet, or the emotions of fear, hate, jealously. But there comes a time when this chronic drive reaches the acute state, and it is then that the individual is endangered by death from cybaustion or from poisons preduced. dividual is endangered by death from exhaustion or from poisons produced by excess of emotion. It is when the kinetic drive reaches this height of its driving force that Dr. Crile has come to the point of lessening the drive by cutting down one or the other of the two connecting links between the brain and those members of the body where these poisons are of the body where these poisons ar

### Diabetes and Stocks.

Diabetes and Stocks.

Just what happens to a victim of an acute kinetic drive is this, set down in nontechnical language: When the complicated machinery of modern civilization drives a man or woman along the road of his own destruction through too hard work and too bard "living" generally, the activity of his brain calls for more and more fuel from fluids created in the liver and kidneys. These are the driving force of the brain, in Dr. Crile's figure, and the thyroid gland is the pacemaker. Too much of these fluids get into the system, and such disease and others. That disbetes is the direct result of the brain of the system and such disease and others. That disbetes is the direct result of the brain that the various Government departments, located in the District of Columbia, may be in the District of Columbia, may be seriously hampered in obtaining their supplies of pure grain alcohol, no exception being made whereby they columbia more than tive gallons at one purchase. Many of the departments by reason of the work performed in the laboratories, are compelled to use alcohol in large quantities.

"Another feature which seems to have the thyroid gland is the pacemaker. Too much of these fluids get into the system, and such disease and others. The disease and others that the various Government departments, located in the District of Columbia, may be seriously hampered in obtaining their supplies of pure grain alcohol, no exception being made whereby they could be aboratories, are compelled to use alcohol in large quantities.

"Another feature which seems to have a control of the departments and the part of Columbia. The part of Columbia, may be seriously hampered in the District of Columbia, may be seriously hampered in the District of Columbia, may be seriously hampered in the part of the departments. In the District of Columbia, may be seriously hampered in the process of the part of the departments love and the part of the departments. That diabetes is the direct result of mental excitement and despair is aptly illustrated by Dr. Crile, who quotes a certain phrasemaker as saving: "When stocks go down in New York diabetes goes up."

Comprehensive Complaint.

Among the strongest and most comprehensive letters of protest received by Senator John Walter Smith, chairman

Washington druggists in their protest.

Senator John Walter Smith, chairman man."

Colonel Sherwood explained the rapid Colonel Sherwood explained the rapid of Hutton & Hilton, Twenty-second and

L streets northwest:

"As a licensed pharmacist of the Pistrict of Columbia, for more than thirty years, as an officer of the Usited States Pharmacepoeial Convention, which body compiles and publishes the United States Pharmacepeia, a standard for drugs and medicines under the Food and Drugs Act, as a member of the revision committee of the National Formulary, another standard recognized by the Food and Drugs Act, and as a member of the American Pharmaceutical Association, and also its council, I feel compelled to enter my humble protest. compelled to enter my humble protest against the passage of Section 1082, as now pending. "First, however, I want to say that

I am not championing the cause of prohibition nor am I advocating a wide open policy on this question. The prermacist is not and does not want to be a rum seller. The present law sceris to me adequate and sufficient with respect to the sale of alcohol and has already in a few months accom-plished much good.

"I am speaking only for our special calling and with respect to pure grain alcohol. The retail pharmacist, by the nature of his calling, the proper preparation and preservation of medi-cines for the sick, is required to pur-chase and use pure grain alcohol to properly prepare and preserve same. Let me point out as forethly as pos-sive that under no condition whatsoever do we use grain alcohol in the preparation of medicines or any me-dicinal compound solely for the alco-

NEW YORK, Feb. 4.—All over the world today men are fighting harder, working harder and "living" harder than obtaining our legitimate supplies for the party of th proper pharmaceutical manufacturing purposes, and it seems foolish that we should be limited to the purchase of five callons only, when frequently in manufacturing pharmacopoetal and na-tional formulary preparations, fluid ex-

fession or calling that is surrounded of affected by so many laws as that of the pharmacist, many of which have been enacted at his suggestion for the purpose of keeping out incompetents or properly to protect the public health, so ably got its information from British. that today the business of the retail pharmacist is almost law ridden, and the average pharmacist cannot tell sometimes whether he is violating some law or not. The present law governing the sale of grain alcohol works admirfect of faith in the healer; all sorts of cults based on belief in prayer were others, and so were travel, diversion, measurements, books that produced tranquillity of mind and systems of months. At least 9t per cent of the though in working operation a few months. At least 26 per cent of the druggists of the District of Columbia do not sell or keep alcoholic beverages.

They have not for more than twenty years. But off the sale of grain alcohol to the public, if it is so desired. We will raise no objection. We do, however, object to being hampered, overburdened, annoyed, and put to extra expense in obtaining our supply of alcohol for true legitimate, pharmace-

## "I further desire to call to your at-

tention that by the wording of this bill, It is more than probable that the vari-

have to handle same, can be under if this bill should become a law? It will be unlowful to have some in ones pos-session and it may be impossible to dis-pose of stocks on hand before the law becomes effective. Will it have to be thrown in the streets or sewers?

"I therefore their submit, from standpoint of the pharmacist that is is a self evident fact that the bill was rawn by some one and regulzant of the true facts as far as the charme-cist is concerned, that the sile pur-pose in view is a silf-evident one of tanaticism and an effort to bring about absolute prohibition, regard-less of what herm may be lone to an

honorable calling or to the sick and needy, increasing the cost of needt-ine, and unnecessarily hampering ur profession or calling
